**e-commerce features are listed on attached page.*

E-COMMERCE WEB SITE FEATURES

- **Retail Shopping** - Order a single item or many at a time, simple turn-page navigation, user tracking, and international support.
- **Checkout** - Editable and Intuitive shopping basket functions include built-in checksum for credit cards and supports secure real-time payments. Six Payment Options are already included: Visa, American Express, MasterCard, Discover, fax-in, call back and Cybercash.
- **Online Administration** - Add, edit, or delete your product inventory items with 3 possible levels of hierarchy, easily make global site changes, customize page settings, create multiple auxiliary pages, duplicate databases, customize shipping and taxes, and check your new orders here.
- **Replybuilder** - Create custom forms on-the-fly, guest books, and auto-email responders for your customers. No database changes needed to design large complex custom forms with Replybuilder.
- **Discounts** - Allows merchant to give discounts or specials on an item or groups of items with a variety of methods.
- **Store Features** - Power Search, What's New, Directory, and Mall page wizards available. All pages are dynamically generated and updated.
- **Security** - Secure and unique logins for administrators of the system with two levels of security rights. Located on a SSL Secure Server.
- **Wizards** - Select from many different wizards and options to customize the page formatting with individual or global effects. Use custom or shared wizards for storefront design, power search, what's new, directory, and others.
- **Shipping Calculation** - Select between 5 different methods to calculate shipping. Also includes international shipping.
- **Powerful Search** - Power search can find products by name or description with optional price range searches.
- **No HTML Necessary** - There is no need to know HTML programming to update your inventory. Just fill out simple online forms from your browser to administer your store.

NOTES:

The built-in Cybercash payment feature can verify credit card purchases in real-time and deposit to your merchant account.

Assumes hosting on our server for \$54.98 per month with NO TRANSACTION CHARGES.
